

My Family

1. My husband, Tom, is 37 years old. He is a scientist. He does research in biology at a university and puts a lot of energy into his work. Sometimes, **he** gives lectures to students. When he comes home, he is usually very tired and watches TV. He **does this** most of the time on Saturdays and Sundays. He does not go out much because he doesn't like places with a lot of people. He hates driving too. We also hate when he drives, because he drives so slowly! 5
2. We have four children and a pet, Tabby. She is a black cat. She loves to eat, and she always eats quickly. Because of **this**, she is fat. We buy **her** very expensive food: a kilo of cat food costs a lot of money.
3. Our four children are Daniel, Joe, Kate and Mary. Our youngest son, Daniel is only 11 months old. He already stands by himself (בכוחות עצמו). Joe is 9 years old. He likes mathematics and science. He also enjoys playing football, and he is a member of the school team. He often plays video games on his computer too. He hates vegetables and fruit, but he loves meat. My two daughters, Kate and Mary, are twins. They are 6 years old and look very similar. **They** study at a local public school. When they are not in school, they spend time playing with **their** toys and watching TV. They hate meat but love vegetables. 10 15
4. I am Britney, a 32 year-old nurse. I work in a big hospital in the neighborhood. It is very convenient to work close to home. I love my job because I like helping sick people. 20
5. My life is busy with my job and my family. I also take care of our beautiful garden. On the weekend, I often take my kids to the large park in the city. Sometimes, I go shopping. Tom usually stays at home and watches his favorite TV programs.
6. We now live in the United States of America. But our plans are to move to Spain. 25
